

4/20/15

Good evening, my name is Bob Shofner I 'm a beef cattle farmer from Centerton Arkansas. And I am speaking tonight in favor of this proposed resolution change. As stated earlier this evening, the difference is just in the method of applying the product. The pipe traveling gun verses a slury or as in the agriculture word, Honey wagon. This is an accepted practice throughout the agriculture industry in moving waste. We're not doing anything different, we're not changing anything,. We're using an all-natural organic fertilizer to be applied onto fields which will replace commercial fertilizer. So again I come up and state that I am in favor of this change. I feel like this is very good. I also thank ADEQ for allowing this public comment to show everybody in the public arena that this is something that is above board. We are out here in public comment. There is nothing to be hid or to be...as some people say this all has been done behind cloth and darkness. This is in a public form hearing. Thank you.
