Mar 4, 2014

Director Teresa Marks  
Arkansas Department of Environmental Quality, 5301 Northshore Drive  
North Little Rock, AR 72118-5317

Dear Director Marks,

I am writing to ask you to fully reopen the permit for C&H Hog Farm for public comments. C&H is the first industrial-scale hog facility to be located in the watershed of the iconic Buffalo National River and the first facility in Arkansas to be granted coverage under the NPDES Concentrated Animal Feeding Operations ("CAFO") General Permit ARG590000.

As you are aware, significant concerns have already been raised with the adequacy of this permit. As a citizen of the State of Arkansas and a taxpayer, I am appalled at the expense the state has committed toward the operations of this CAFO in the Buffalo River Watershed.

Thank you for considering my request.

Sincerely,

Ms. Carrie Mahony  
Peoria Lane  
Moreno Valley, CA 92557
