Subject: C & H Hog Farm permit
Date: Thursday, April 16, 2015 4:17:45 PM

The C & H Hog Farm's proposed plan to allow land application of hog wastewater from Waste Storage Pond 2 via tanker-wagon should be denied with no exceptions or further consideration.

Reliable, accurate information about the content of the waste is not available. The amount of Phosphorus, Nitrogen and other nutrients already on the affected fields is not accurately known. Incorrect acreage maps are part of the proposal. This waste water would seep into the field's underlying karst and run off would go into Big Creek, thence directly into the Buffalo National River.

The C & H Proposal would be a further disaster for the water quality of the Buffalo National River, as is the very existence of the C & H Hog Farm. The entire permit for C & H should be reopened to the public for comment.

Thank you for your consideration,
Ellen Compton
