I live in Mountain Home, AR and visit the Buffalo River several times each year. I come to the Buffalo because of its unspoiled water and scenic beauty. The Buffalo River renews my faith in humanity because someone had the foresight and made the effort to preserve this treasure. I fear that historic action is being undone by allowing a polluting industry within the Buffalo's watershed.

Dye tracings and water monitoring have shown that in this regions' karst topography C&H Hog Farm waste practices will pollute Big Creek and ultimately the Buffalo River. I am adamately opposed to exposing this national treasure to this degradation. Therefore let it go on record that I also oppose this most recent proposal to modify the Nutrient Management Plan which would allow wastewater application from storage pond 2 via tanker wagon.
