---

I am writing to support a DENIAL of a request by C&H Hog Farm to spread hog wastewater from Waste Storage Pond 2 by tanker-wagon.

I am deeply concerned about the content of the waste and whether we know enough about its make-up to ascertain how this waste will affect the water quality of Big Creek and, ultimately, the water quality of the Buffalo.

To allow the spreading of unknown content onto this watershed is not good science nor good stewardship, and it should not be permitted.

I appreciate the opportunity to comment.

Respectfully yours,
