**Subject:** Request by C&H Farms to install pin liners and a methane flare.  
**Date:** Monday, August 03, 2015 9:07:18 AM

---

To whom it may concern:

I oppose the request by C&H Farms to install pond liners and a methane flare. There is too much risk of further contamination in the removal of the sludge in the ponds. And where will they put it while the liners are installed? The risk of further ruining the air quality in Mt. Judea is real and should be considered.

Please deny this request.
