I was told by a member of the Henson family (she was a college roommate of my daughters) near the beginning of all this - at the ~~9/21~~ hearing held at the Carroll Electric in Jasper - that the construction of the ponds at C&H were ~~not~~ done to ^{day} all the specifications - in fact - had 2 more inches of ~~than~~ than asked for. So why do ponds 1 & 2 need to be emptied - relined w/ plastic - already? So the waste that is in Pond 1 will have to be removed before settling and spread on the fields? Is the pond leaking? I am concerned that this system is malfunctioning already. I am also concerned about the air quality for the citizens around the facility if this Flare is installed. Will this ^{be monitored & reported?} ~~what about the affect on the ground water~~

NO - DON'T DO THIS!
