Subject: C & H Hog Farm permit modification
Date: Tuesday, April 14, 2015 1:34:58 PM

I request that the ADEQ deny the C & H Hog Farm proposed modification of their Nutrient Management Plan to allow land application of hog wastewater from Waste storage Pond 2 by tanker-wagon .

C & H should not be allowed to use a vac-tanker truck to apply hog wastewater to any of the fields from Pond 2 because they have not presented reliable, accurate information about the content of the waste

or the amount of Phosphorus, Nitrogen and other nutrients contained in this waste, nor have they presented reliable data on the level of nutrients, Phosphorus and Nitrogen already applied to some of the fields.

Sincerely,

John Ferguson
