Subject: C&H modification request to install synthetic pond liners, a cover and gas flare

As a resident and property owner of East Newton County I ask you to please, deny this request for modification.

This hog waste has already leaked into the Buffalo River and the area's ground water. This is not the way to correct the problem of the leaking ponds. Digging them up will result in more leaks.

The stench is all around Mt Judea and at times carries even further. Allowing a "flare" will make the problem of air pollution even worse. The residences of this part of Newton County deserve protection from both of these contamination sources.

You cannot let one family ruin the environment of several thousand Newton county citizens.

Thank You,

James McPherson
