Becky Keogh, Director

Ryan Benefield, Deputy Director

Arkansas Department of Environmental Quality

Dear Sirs,

The C&H documents continue to contain incorrect maps regarding **ownership** of field 5 and parts of fields 12 and 16. Until these ongoing errors are corrected I hereby ask **all requests by C&H for permit modifications be denied and have these errors corrected within 30 days.**

Big Creek Research and Extension Team are using some **unexplained** field numbers, including a field 5a. This field is not part of the NMP and is reportedly not receiving any waste applications from C&H.

This further confuses the ongoing **errors and misrepresentations** regarding application field ownership and identification.

Respectfully,

Dr. Luis Contreras
