Subject: C & H Hog Farm Permit Modification
Date: Tuesday, April 14, 2015 6:01:19 AM

Please **DENY** the C & H Hog Farm proposed modification of their Nutrient Management Plan.

C & H should not be permitted to apply hog wastewater from Pond 2 to any field without reliable and accurate information about the level of nutrients including phosphorus and nitrogen that are already applied to some of the fields.

Thank you.
