---

Please deny this modification.

It's ridiculous that a special permit is being presented and commented on.

My understanding is the initial C&H Hog Factory application was inaccurate, incomplete, and filled with commitments that have so far not complied with promises made. The environmental review was non existent, incomplete and an embarrassment. The taxpayer backed loans made by the SBA and others should never have been approved considering the documentation that was provided. No public notice, no public comment period. The local city, county, and federal entities were not kept abreast of this major, major decision.

Why in the world are we being asked to add to the problems, issues, and pollution when the existing operation does not pass the smell test.
