The following question/comment on C&H came in through the Help-Water email address from the website. I believe that I am the only one in Water Division that receives emails from the address.

Kimberly A. Fuller, P.E.
NPDES Engineer Supervisor
ADEQ, Water Division
Phone: (501) 682-0643

Questions_Comments:

Ref. arc590000 Most old time farmers would put hogs in a leaking pond to stop it from leaking. Therefore C&H should be allowed to pump waste water from storage pond #2. I have used the hay from where the waste water is applied. There seem to be little or no difference in quality. It may be that because there is less than one-eighth of inch applied per acre. This is nothing compared to chicken litter
