Subject: Numerous Studies should be done before anything is done but spreading the hog litter to go into the First National River is Ludicrous.
Date: Tuesday, April 14, 2015 3:10:06 PM

•Spraying untreated sewage within a community where some residents rely on wells for drinking water, where a school is in close proximity to spray fields, and where thousands of visitors come to swim, canoe, and fish is creating a public health problem.

As a Realtor, I am concerned about the cost in tourism and property values.

Thank you for your time. Marilyn Shoffit
