---

I object to the request by C&H to use tanker trucks to spread waste. This usage will allow for waste to be spread in higher concentrations over more land area, and is not consistent with recent federal court rulings that require the Environmental Assessment for this facility to be re-performed due to the poor quality of the current version. Modifications to the permit that allow for higher quantities of waste to be spread to larger land areas should be approved until a valid Environmental Assessment is completed. Thank you for your consideration of my comments.
