The C&H Hog Farm is one of the greatest concerns I've had for a long time in regard to our valued natural resource, The Buffalo National River. As you know, they have recently applied for a water draft permit to spread untreated waste from Pond 2 on surrounding areas. In a letter dated March 3, 2015, attorney Monica K. Reimer called your attention to some facts that need to be considered. Please remember that the citizens of AR, as well as our nation and other countries have been, and will continue to be, benefited from protecting our river when one company and farm will benefit if decisions are made in their favor. Please know that I and my family and friends are gravely concerned about the need for extra precaution being taken in regard to our treasure, The Buffalo National River. Thank you so much for your consideration in this matter. Nancy Garner, Fayetteville resident
