Subject: Fw: Hog Farm Waste Disposal Permit
Date: Monday, April 13, 2015 6:41:40 PM

Hello,

Please **do not let the waste from C& H hog farm, pond 2, be distributed onto nearby fields.** We /You don't know the chemical content of those fields now nor the chemical content of the waste to be distributed.

Poultry farmers have to comply with keeping their waste distribution to a level so that there is not excess to run off into the waterways. Excess waste from C & H will run into Smith Creek which runs into the Buffalo River- one of our state's most treasured assets. It is treasured for its clear beautiful water among other things. Please protect our asset from use as a sewer by a commercial enterprise.

Thank you,
