To Whom it May Concern:

I am writing to say that my family and I are opposed to any modification in the permit to C & H Hog Farm. This permit is minor in comparison to the totality of the impact of this blight on the Buffalo River that your agency had permitted and is allowing to continue. For those of us who live near and recreate on the Buffalo, the hog farm is a travesty; apparently to you who live in Little Rock where such pollution must be a matter-of-fact, the first national river park’s pristine environment is not important. How else could you let this continue? Please do not modify the permit, and please stop this public health/economic/environmental/scenic disaster.

Sincerely,
Nancy Deisch
