---

John,

I wanted to make sure that you received this comment on the hog farm.

Terri,

Will you please process this into the mail log, Zylab, and on the website? Thanks!

Kimberly A. Fuller, P.E.

Questions\_Comments:

I urge you to re-evaluate the facts used in your determination when issuing a permit to C&H Farms. The Buffalo River is The Most Cherished natural resource in the state of Arkansas. To make a mistake on this one would deny the people of Arkansas and our future generations a truly valuable experience. How can anyone control the heavy 2 and 3 day downpours that the state usually experiences at least once per spring season? There are numerous other locations within our state that could better support being home to 6,500 swine and their waste. Please reconsider the damage that will turn the Buffalo into just another polluted river that no one can enjoy. How does approving a permit for a Hog Farm along a tributary of the Buffalo River even apply to your Departmental strategy to Protect, Enhance and Restore the natural environment for the well being of all Arkansans? Thank you for your consideration.
