Subject: C&H Hog Farm General Permit ARG590000
Date: Friday, April 17, 2015 12:07:58 PM

Greetings,

Please consider my comments when making your decision about the C&H Hog Farm's permit modification request.

My concerns are as follows:

Based on the recent federal court ruling that requires a redo of the " cursory and flawed " Environmental Assessment of C&H, it is hard to understand how ADEQ can approve this or any other permit modification. By approving this modification request, ADEQ would be saying that C&H can continue in the face of the court ruling, the scientific research, and public concerns. Therefore, I believe that no modifications to the permit should be allowed.

Also, numerous, ongoing mapping and land ownership errors need to be corrected. These maps and contracts identifying where waste is to be applied need to be clear and up-to-date.

With ADEQ continuing to allow errors, omissions, etc., in the NMP, without requiring correction, further complicates adjustments that may be made in the future. All modifications should be denied until an accurate and correct version is submitted.

Thank you for your consideration.
