To whom it may concern:

I love the Buffalo River, and all that it stands for in our great state and nation. It is a beautiful place for me and my husband to take our sons, ages 2 and 6, in order to relax, bond, and enjoy nature in its purest form. If E. Coli levels are rising in the water and oxygen levels are dropping due to runoff from the C&H Hog Farm, we will no longer, with any sort of peace of mind, be able to take our children to the river, which would make me beyond sad, not to mention ashamed for our current climate of acceptance of horrendous things like this taking place...all for the sake of profit and pork. Please, please assure that any modifications to the permits given to C&H will protect our beloved Buffalo and that there is an extreme amount of care and consideration given to this issue, as well as oversight of the facility and its practices.

Thank you,

Rebecca Liles
