Subject: C & H Hog Farm CAFO permit proposed changes

To whom it may concern;

I am sending this note to you as affirmation of my support for you allowing C & H Hog Farms to make the proposed changes to their CAFO permit. It is my belief that C & H Hog Farms should be allowed to make these changes in order to continue to operate their private enterprise free from harassment and encumbrances.

While I am extremely incensed that it is necessary for them to continue to have to make additions and changes to their operation which far and away exceed any proven scientific data and any regulations currently on record, I support their efforts to do so. While I am infuriated by the unnecessary regulatory interference they are forced to endure to operate their private business, I support their willingness to do so. While I am sadly disappointed by the fact that the government of what used to be the greatest free enterprise nation on earth would cower to such unethical, unsupported, and unsubstantiated pressures by a very vocal minority of highly funded activists, I am proud of the high road the owners and operators of C & H Hog Farms have taken to meet every challenge that has been thrown at them. As long as we continue to allow such groups as those opposing this free enterprise operation to control the government and the regulatory agencies of that government we can expect to see production agriculture continue to decline and the price of our food continue to climb while the availability of our food and the quality of our food will diminish.

Once again, please allow C & H Hog Farm to make the proposed changes to their CAFO permit.

Thank you;

Ross Lockhart
