Re: NMP Revision, Land Application Method
AFIN: 51-00164, Permit No.: ARG590001

Mr. John Bailey, P.E.
Permit Branch Manager
Water Division
Arkansas Department of Environmental Quality
5301 Northshore Drive
North Little Rock, AR 72118-5317

Dear Mr. Bailey:

C & H Hog Farms, Inc. respectfully requests a revision to its Nutrient Management Plan (NMP) pertaining to the land application methods for Fields 7-9.

Pursuant to Section B.7.c. of the Nutrient Management Plan, the use of a vactanker is an approved method for land application of liquid manure. C & H Hog Farms requests a revision to Section M of the NMP to include the use of a vactanker for Fields 7-9. The Arkansas Phosphorus Index risk calculations for these fields are unaffected regardless of which land application method is utilized. Therefore, C & H Hog Farms is optimistic that ADEQ will be able to grant this reasonable request.

We look forward to your reply.

Sincerely,

Jason Henson

Amy,

Can you get this on the website?

Thanks,
John
