RE: Annual Manure Sampling  
NPDES Permit Number ARG590001, AFIN 51-00164  
Jason Henson - C & H Hog Farms

Dear Mr. Henson:

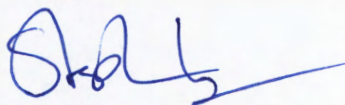

Please be advised that in accordance with section 4.2.1.3 of the above referenced NPDES CAFO General Permit you are required to analyze manure a minimum of once annually for nitrogen and phosphorus content. Due to the original Nutrient Management Plan being based on typical manure results, the Department requests the actual data from the sampling be provided prior to any land application taking place as required by NRCS Code 590. Upon review of the data, the Department may revise the application rates or the Nutrient Management Plan to comply with section 4.2.1 of the general permit in accordance with Condition 6.3 of the general permit.

The manure sampling results must be received by the Department no later than August 3, 2013. If the information cannot be provided by the requested deadline, you must notify this office in writing within 10 days of the date of this letter and provide a proposed schedule for submission of the requested information. Failure to submit the required information could result in enforcement action.

Please submit the above requested information to the address below.

Thank you for your cooperation. If you have any questions, please feel free to contact myself at (501) 682-0651 or by email at [hogan@adeq.state.ar.us](mailto:hogan@adeq.state.ar.us).

Sincerely,

Stephen Hogan, P.E.
