ADEQ,

I protest the presence of this major concentrated animal farming operation on Big Creek, a tributary of the Buffalo River - our First National River. Mainly the liner and the soil beneath it will be, if it's not already, compromised through time. This is a very bad idea.

This is a crime to our environment carried out by a multinational conglomerate which has no interest in the community of Mount Judea and the Buffalo River. If there's any pollution of the Buffalo River as a result of the operation of this CAFO, there will be a very high price to pay by the State of Arkansas and the people of the United States.

Sincerely,

Stephen Farar
