Re: C & H Farms Modified Draft Permit ARG590001 AFIN 5100164

Dear Director Marks:
The comments below pertain to the modified portion of the permit as revised by C & H Hog Farm.

Any such spraying of waste on fields 7 or 9 is a violation of the permit and the Clean Water Act.

ADEQ, as the state agency charged with preventing, controlling and abating pollution that could harm Arkansas's valuable natural resources, should deny C & H's request to spread manure on fields 7, 8 and 9 by vac tanker.

In addition, ADEQ should reopen the permit in its entirety.

Shawn Porter
