Re. C&H Hog Farms, Inc., Nutrient Management Plan Modification; ARG59001 AFIN 51-00164 C&H Farm

I rigorously oppose ACEQ's decision to consider a modification of the C&H Hog Farms, CAFO permit without reopening the original permit.

This CAFO permit was granted by your organization without adequate public notice or comment.

ADEQ is going to permit this CAFO to spread over two million gallons of smelly and poisonous waste affecting property and the tributary to the Buffalo River ?

Also, ADEQ did not consider the karst geology of the area that will allow direct flow into the Buffalo.

Is the ADEQ going to, once again, fail the people of Arkansas?

Please do not allow C&H to pollute our beautiful, tourist-loving area without a complete review of the entire process of the original permit.

The C&H request for permit modification is almost exactly like the original NOI, **with inaccuracies intact.**

Please do not consider this modification. Do your job!

Thank you.
