If the parameter benchmark value is exceeded, the facility must investigate the cause of each parameter exceedance and determine a corrective action plan. To do this, indicate below in which sampling period an exceedance occurred. If more than one sample was taken at a sample location, indicate all sample results that exceeded the benchmark. Note: If the facility exceeded the benchmark for more than one parameter (e.g., turbidity & zinc), make additional copies of Section 4 and complete one for each parameter.

Pollutant Parameter: TSS benchmark was exceeded during the following sampling period (check all that apply):

1st Sampling period (January-June)

2nd Sampling Period (July-December)

For the each pollutant parameter exceeding the benchmark summarize below any corrective actions plan **completed** during the previous calendar year and include the dates you completed the corrective actions.

Haul roads were watered throughout dry periods of the year (June-October 2013) to decrease dust dispersion.

For the each pollutant parameter exceeding the benchmark summarize any corrective actions plan **initiated** during the previous calendar year, but have **not yet been completed**. Identify the date you expect to complete corrective actions.
