Re: 2013 Annual Report & DMR Submittal – Benchmark Exceedances  
Waste Management-Tontitown Landfill, Springdale, AR  
Permit No. **ARR000231, AFIN 72-00144**

Dear Ms. Taylor,

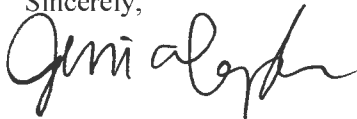

The 2013 Annual Report and Discharge Monitoring Reports (DMRs) for the above-referenced facility in Industrial Sector L1 of the General Industrial Stormwater Permit were received 1/31/2014. The annual report has been determined to be in compliance with the applicable permit requirements. The following is a list of pollutants for which the facility has exceeded the benchmark values set for the stormwater runoff:

<u>Pollutant</u>	<u>Reported Value(mg/l)</u>	<u>Benchmark Value (mg/l)</u>	<u>Outfall</u>	<u>Period</u>
Total Suspended Solids	180	100	002	Jan-Jun

There are no effluent limitations in the general stormwater permit. The purpose of the general permit is to encourage the industrial sector to find Best Management Practices (BMP's) that can be implemented without being mandated. By relaying this information to the industries, the Department hopes to significantly reduce the overall pollutant concentrations for Industrial Sector L1.

If you have any questions concerning this matter or need additional information, please feel free to contact the General Permits Section at (501) 682-0623.

Sincerely,

Jessica Temple  
Engineer, General Permits Section  
Water Division
