Re: NPDES Stormwater Industrial Permit, DMR Submittal – Too Early
Drew Foam Companies, Inc., Monticello, AR
Permit No. ARR000817, AFIN 22-00057

Dear Ms. McClendon,

You are receiving this letter because ADEQ general permits section received stormwater Discharge Monitoring Reports (DMRs) from your facility for the first half of 2012.

While it is a requirement of the general stormwater discharge permit that you sample your effluent twice per year, we ask that you send both DMRs together along with your annual report. This single mailing is due before January 31st of the year following the monitoring.

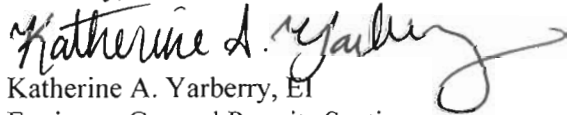

This facility is classified as Industrial Sector Y2 of the General Stormwater Permit. This DMR did include data for all the required parameters of the General Permit. This industrial sector has the following benchmark parameter monitoring requirements:

<u>Pollutant</u>	<u>Benchmark Value (mg/l)</u>
pH	6.0 s.u. to 9.0 s.u.
Chemical Oxygen Demand	120
Total Suspended Solids	100
Oil & Grease	15

For further instructions on filling out DMRs and for a copy of the newest version of the DMR form, please see our website at:
http://www.adeq.state.ar.us/water/branch_permits/general_permits/stormwater/industrial/industrial.htm

If you have any questions concerning this matter or need additional information, please feel free to contact me at (501) 682-0627 or yarberryk@adeq.state.ar.us.

Sincerely,

Katherine A. Yarberry, EI
Engineer, General Permits Section
Water Division
