July 2, 2021

Kasey Walker 103 Old Senior Rd. DeQueen, AR. 71832 Permit# 24412302

The plans and specifications for the above captioned project have been received and reviewed. Please be advised that as the owner you are responsible for the following:

- 1. All costs relating to the operation and maintenance of the system.
- 2. Meeting all effluent requirements.
- 3. Financial responsibility for effluent monitoring and sampling by a Certified Maintenance Person.
- 4. Filing for the National Pollutant Discharge Elimination System (NPDES) General Permit (ARG550000) permit with the Arkansas Department of Environmental Quality before any construction begins.
- 5. Any changes from the specified design will require a new maintenance contract and a resubmission of the permit.
- 6. This approval is for an on-site retention scheme for all effluent generated from the specified residence on the permit on 3.79 acres near 103 Old Senior Rd. near DeQueen, Arkansas in Sevier County. Any off-site discharge or further subdivision of the property may void this approval. Additional measures to ensure on-site retention of all sewage effluent generated may be required at a later date should the discharge leave the property.

This system must be installed to meet the specifications for the design attached to the construction permit, and installation should not begin until the installer has reviewed these specifications. Health Department approval of this project does not release the owner of any liability resulting from the discharge of sewage effluent.

If you have any questions, please contact the local environmental health specialist at your local health department.

Sincerely

Kelly Riley SWR Environmental Onsite Program Specialist 870 285 3154 (Office)

Arkansas Department of Health

4815 West Markham, Slot 46 Little Rock, Arkansas 72205-3867

MEMORANDUM OF AGREEMENT

SUBJECT: ONSITE WASTEWATER SYSTEM APPLICATION

This is an agreement that the onsite wastewater system installed on this property has been permitted under authority of Act 402 of 1977 and by the Arkansas Department of Health with the understanding that the following provisions are met:

- Onsite Wastewater Systems requiring a Monitoring Contract with a Certified Monitoring Personnel are Holding Tanks, Experimental Systems (i.e. Reduced Absorption Areas, *ABGs), and Drip Dispersal Systems. *Aerobic Biological Generators – Commercial applications only, residential applications must follow manufacturers' service contract requirements.
- The property owner assumes all responsibility for the proper operation of the onsite wastewater system.
- The property owner must maintain a monitoring contract with a licensed Certified Monitoring Personnel for the life of the system and retain Onsite Wastewater System Assessments (EHP-71), on file, for at least five (5) years.
- The Arkansas Department of Health has no responsibility in the operation and maintenance of such systems.
- That the Arkansas Department of Health may monitor the system as to its operation capabilities.
- That the Arkansas Department of Health is granted permission to make such inspections as deemed necessary.
- Subsurface systems with flows ≥3000 gpd and all surface discharging systems require the owner to file an additional permit application with the Arkansas Department of Environmental Quality (ADEQ).
- 8. That, on the sale of the property, the owner of the property must disclose to the perspective buyer notice of this agreement and any permit requirements. The buyer is to sign memoranda, contracts or permit name change forms and submit these documents to the appropriate regulatory agency.
