Dear State Representatives:

The enclosed report covers the 2023 annual pretreatment report for our NPDES Permit # AR0020273. The 2023 report covers the reporting period of July 1, 2022, through June 30, 2023. The City of Siloam Springs would like to report that none of the permitted industrial users met the criteria for significant non-compliance as defined in 40 CFR 403.8.

No interference, pass through, upset, or POTW permit violations were known or suspected to have been caused by an industrial contributor during this period.

If you have any questions, or comments regarding the 2022-2023 annual report, or if you need additional information, please feel free to contact me.

Respectfully submitted,

(1) It is advised that the influent and effluent samples are collected considering flow detention time through each plant. **Analytical MQLs must be met for the effluent (and SHOULD be met for the influent) so the data can also be used. for Local Limits assessment and NPDES application purposes.**

(2) This value was calculated during the development of TBLL based on State WQ criteria, EPA guidance and either ADEQ Pretreatment staff Excel spreadsheets or the Permittee's consultant with concurrence from Pretreatment staff.

(3) Record the name of any pollutant [40 CFR 122, Appendix D, Table II and/or Table V] detected and the concentration at which they were detected.

MAHL - Maximum Allowable Headworks Level / MAHC – Maximum Allowable Headworks Concentration

WQ - “Water Quality Levels not to exceed” OR actual permit limit.
