Subject: Baxter (ARP001045) June 2010 Closure Plan and De-Categorization (Mountain Home AR0021211)

Ms. Walker,

Your correspondence received 7/14/10 was reviewed. Please accept the following for your files.

Based on your statements and closure plan, there are no longer any federally regulated processes generating wastewater subject to Pretreatment Standards under 40 CFR 433 existing at your facility in Mountain Home, Arkansas.

None of the following six(6) core operations exist at your facility: Electroplating, Electroless Plating, Anodizing, Coating (chromating, phosphating, and coloring), Chemical Etching and Milling, and Printed Circuit Board Manufacture. Please advise this is correct.

This office officially de-categorizes your facility. Semi-annual reports are no longer due ADEQ and your file will be closed.

If there are any changes in the future that may effect this "de-categorization", please immediately contact this office as well as the City contact. If there are any changes/additions to your existing processes or raw material that may change the characteristics of your current wastewater, please notify this office and the City.

This office wishes you well in the future and it was true pleasure working with you as a cooperative stakeholder in achieving the objectives of the Clean Water Act.

Sincerely,

Allen Gilliam
ADEQ State Pretreatment Coordinator
