§6602 [42 U.S.C. 13101] Findings and Policy para (b) Policy.--The Congress hereby declares it to be the national policy of the United States that pollution should be prevented or reduced at the source whenever feasible; pollution that cannot be prevented should be recycled in an environmentally safe manner, whenever feasible; pollution that cannot be prevented or recycled should be treated in an environmentally safe manner whenever feasible; and disposal or other release into the environment should be employed only as a last resort and should be conducted in an environmentally safe manner.

The User may list any new or ongoing Pollution Prevention practices:

(8) GENERAL COMMENTS

The potable city water that supplies the wash equipment was sampled as well as the effluent.

Copper level in effluent was 1.20 mg/l.
Copper level in potable water was 0.610 mg/l.
Zinc level in effluent was 4.37 mg/l.
Zinc level in potable water was 0.205 mg/l.

The facility discovered zinc levels that exceed permissible levels. The facility disclosed upset condition to ADEQ within 24 hours of discovery and has resampled. Second sample showed higher than permissible levels also. EZ Loader is working to isolate the source of zinc. Holding tanks are being cleaned and then a third sample will be pulled. If zinc levels remain high, the facility will filter the effluent before it is pumped to holding tanks for pH check prior to discharge to POTW (City of Mountain Home). Final action is dependent upon results of third set of samples.
