Kevin,

Your semi-annual report was received on 6/22/09. Your analysis showed you are compliant with the federal categorical limitations in 40 CFR 433.17. With the submittal and approval of your toxic organic management plan, you're certification statement per 40 CFR 433.12 makes this semi-annual report complete.

The general schematic sent indicating flows is not necessary in the future. You've already reported flows on the semi-annual report.

The city's potable water copper and zinc levels analyzed were above averages this office has seen statewide and it may be prudent to continue monitoring for these two metals.

It may also be advisable to contact the city's water treatment plant superintendent to ascertain what type of corrosion inhibitors/program they have in use. Zn ortho-phosphate, if not dosed properly can cause high drinking water Zn levels.

If there are further questions, please feel free to contact this office.

Sincerely,

Allen Gilliam
