(8) GENERAL COMMENTS

Note that the for this report period no analytical data was available, therefore, the best available analytical data was used which is represented by the analytical data from JAN 2021. In the future waste water sampling will be conducted twice per year, during each reporting period to remediate this situation.

Zn noted above benchmark values from the JAN 2021 sampling event. Facility continues to work with treatment vendors to replace treatment chemicals to bring Zn content in discharge below established benchmarks.
