Subject: AR0021806_Little Rock 40177 and 50849 March 2013 Annual Pretreatment Report reply_20130401

Jeff,

Little Rock Wastewater's March 2013 Annual Pretreatment Report was hand delivered to this office on 3/29/13, reviewed, deemed complete and compliant with the Federal Pretreatment reporting requirements in 40 CFR 403.12(i).

The pollutant "trend" charts indicate chromium (T) has been increasing at Adams Field and Fourche Creek since ~ '06 (especially in their effluent). Do you have a "feel" for this increase?

Thank you for the comprehensive report remaining in compliance with the Federal Pretreatment reporting requirements and those in your NPDES permit. There is no further action deemed necessary at this time.

Sincerely,

Allen Gilliam
ADEQ State Pretreatment Coordinator
