RE: NPDES Permit AR0021806 - Technically Based Local Limit Certification

The purpose of this letter is to provide written certification that a technical evaluation of existing technically based local limits (TBLL) has been conducted in accordance to NPDES Permit AR0021806 Part I Section B.1. and Part II Item 7.B. Certification of Technical Evaluation by a State of Arkansas Registered Professional Engineer is enclosed with this letter.

In accordance with Permit AR0021806 Part III Section D.11.C:

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with the system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true and accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

RE: Certification of Technical Evaluation
Technically Based Local Limits
Little Rock Wastewater
Adams Field WWTP - NPDES Permit No. AR0021806
AFIN: 60-00409
Little Rock, Arkansas

Mr. Corbitt:

In accordance with the above referenced NPDES Permit, this letter shall serve as certification that Oswald Engineering, Inc. has performed a technical evaluation of the existing technically based local limits (TBLL). This letter shall also certify that the existing TBLLs are based on current state water quality standards and are adequate to prevent pass through of pollutants, inhibition of or interference with the treatment facility, worker health and safety problems, and sludge contamination.

If you have any questions or need any additional information, please contact us.

Sincerely,

OSWALD ENGINEERING, INC.
Fred M. Oswald, P.E.
President

Attachments: LRW Cert Statement Sept 2012.pdf

Scott,

Would you please scan the below e-message (and attachment) sent out yesterday regarding the subject matter to the e-drive NPDES/NPDES/Pretreatment/reports (I just added "reply")? The title given it should be the same as the subject line. If the two cannot be "connected" in one file the attachment should just be titled, "AR0021806_Little Rock Sept 2012 TBLL Certification Statement scheduled compliance activity _20120918"

This is the way I had to get my e-mails scanned thru Katie in the past. I just cc'd her also on the e-mails with the understanding the e-mail was to be scanned to the e-drive's Pretreatment/reports.

I'm sure Rufus will be asking the same of you if he hasn't already.

Thanks,

Arrrrrg?

Jeff,

The documents handed me this morning by yourself satisfies LRW's permit requirements stating, "The permittee shall submit, within sixty (60) days of the effective date of this permit, (1) a WRITTEN CERTIFICATION that a technical evaluation has demonstrated that the existing technically based local limits (TBLL) are based on current state water quality standards and are adequate to prevent pass through of pollutants, inhibition of or interference with the treatment facility, worker health and safety problems, and sludge contamination." (attached)

Thank you for your timely certification.

Sincerely,

Allen Gilliam
ADEQ State Pretreatment Coordinator
