The Honorable James Smith, Mayor
City Hall
10401 High Road
Shannon Hills, AR 72103

RE: Termination of Shannon Hills Sewer Service Contract
Dated 9/22/95, effective October 17, 2009
Arkansas Department of Environmental Quality Files
Adams Field – AR0021806
Fourche Creek – AR0040177

Dear Mayor Smith:

This letter is to acknowledge and confirm the letter dated October 7, 2007, from Erick Richardson, Lemons Engineering Consultants, Inc., as well as the subsequent telephone conversations between Mr. Richardson and Don Hamilton, LRW General Counsel, regarding the captioned matter and the termination of that contract.

This termination extinguishes all further rights and obligations of the parties under this contract, effective October 7, 2007, including but not limited to reporting by LRW of sanitary sewer overflows to Arkansas Department of Environmental Quality, as well as controlling industrial users or enforcing related requirements, including any pretreatment program, which is the sole responsibility of the City of Shannon Hills in the operation of its sewer system, which is no longer connected to the City of Little Rock's sewer system. A copy of Mr. Richardson's letter dated October 7, 2009, is attached for your information and records.

By copy of this letter to ADEQ, this is notice of the termination of the captioned contract and also to request that a copy of Mr. Richardson's letter be made a part of the permanent file regarding this matter and the City of Shannon Hills' reporting requirements.

Yours truly,

A handwritten signature in cursive script that reads "Reggie A. Corbitt".

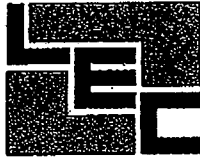

Reggie A. Corbitt, P.E.
Chief Executive Officer

Re: City of Shannon Hills

Dear Mr. Corbitt:

As you are probably aware, the City of Shannon Hills has been in the process of constructing new infrastructure to transport and treat the City's sanitary sewer. As of February, 2009, their new treatment plant was completed. Concurrently, the sewer from the portion of the City East of Vimy Ridge Road was redirected from Little Rock to the new plant. Shortly after, per your request, the City installed a valve and lock box for the forcemain previously used to send sewer to Little Rock. The key for the lock box was given to your staff in case of a possible emergency situation.

Last Friday (October 2, 2009), the City made a permanent connection to the sewer West of Vimy Ridge Road. In the interest of Little Rock Wastewater, the pipe invert to the North of the permanent connection has been plugged and grouted (Hence, no need for a valve or lock box on the gravity sewer main). Presently, there is zero flow to be recorded at the Dollar General metering station. The City of Shannon Hills is currently treating 100 percent of their wastewater.

As always, thank you for your time and the opportunity to work with your company. Please do not hesitate to write/call with any questions or concerns you may have.

Sincerely,

Eric Richardson, E.I.
Project Engineer
