Mark,

Thank you for the quick reply and attached page which completes your January semi-annual Pretreatment Report. The page will replace the existing un-signed/un-dated one and filed. No further action is deemed necessary at this time.

This office can think of no reason to continue monitoring for Arsenic. L.A. Darling may cease analysis of this parameter. Apologies are extended for not catching this nuance before. Curious, but do you still have documentation indicating who asked you to analyze for Arsenic and why?

Sincerely,

Allen Gilliam
ADEQ State Pretreatment Coordinator

Allen –

Sorry for the oversight. The requested document page is attached.

The reason for testing for Arsenic dates back several years ago. At that time, the representative from the ADEQ had requested that we test for Arsenic. Therefore, we have been doing it every year since.

If it is ok with you to cease analyzing Arsenic, then we will stop, as we really do not see a valid reason to continue doing so. Please let us know.

Thanks.
