Re: State Pretreatment Reporting Requirements
(AFIN 56-00389 Parker Tracking #ARP001034 City of Trumann NPDES Permit #AR0035602)

Dear Mr. Copeland:

In reference to Parker's Baseline Monitoring Report [BMR] dated October 26, 2010 and amended with a BMR dated November 8, 2010, the Department (ADEQ) has determined that the BMR is acceptable for verifying compliance with 40CFR433.17. Since the Department is not requiring an Indirect Discharger Permit at this time, Parker may continue to discharge regulated wastewater to the POTW (Publicly Owned Treatment Works / local municipal sewer system) as long as the City of Trumann consents.

In accordance with 40CFR403.12(e) industrial users with processes regulated by categorical pretreatment standards (40CFR433) must submit semi-annual reports to the Control Authority (ADEQ) to demonstrate continued compliance when the discharges from the regulated processes enter, can enter or will enter a POTW. Parker's semi-annual reports are due in February and August of every year. The next report is due in this office in August 2011 by close of business (4:30pm CST) on August 31, 2011. In addition, Parker did not submit the diagram attached to the Department's letter dated March 5, 2010. Please complete this diagram (copy attached) and submit the completed and signed diagram with the August 2011 semi-annual report.

Every semi-annual report must contain the results of sampling and analysis. Parker may submit a Toxic Organic Management Plan (TOMP) in lieu of testing for toxic organics (TTOs) which are not reasonably expected to be present in the discharge. The TOMP has essentially two parts (SMP & Certification):

- a. The Solvent Management Plan (SMP) describes how Parker will control TTOs and need be submitted only once and updated if necessary.
- b. The Certification must be submitted with each semi-annual report. Parker must test for any TTO appearing on the analyses attached to the BMR or appearing on the MSDS at least twice each year and the analyses must be submitted with each semi-annual report. Parker may submit a TOMP/SMP which certifies that TTOs can not enter the sewer in significant quantities and testing for TTOs will not be required.

x

EPA Guidance Manual for Implementing Total Toxic Organics (TTO) Pretreatment Standards is available on the internet. Please contact the Department for instructions on how to access this guidance. This guidance may be helpful if Parker elects to submit a TOMP.

Parker must sample for Cyanide, Cadmium, Chromium, Copper, Lead, Nickel, Silver and Zinc for every semi-annual report submitted to ADEQ. Please be sure methods are indicated on lab reports. In accordance with **§433.12(c)** "*Self-monitoring for cyanide must be conducted after cyanide treatment and before dilution with other streams. Alternatively, samples may be taken of the final effluent, if the plant limitations are adjusted based on the dilution ratio of the cyanide waste stream flow to the effluent flow.*" If Parker does not use cyanide or generate cyanide, Parker may sample for cyanide at the same location for the metal sampling.

Pursuant to **§403.12(e)(1)** in each semi-annual report Parker must "*include a record of measured or estimated average and maximum daily flows for the reporting period for the Discharge reported in*" the "final" BMR (Section 4).

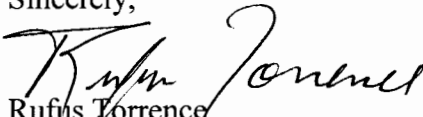

As part of the Department's responsibilities in implementing the National Pretreatment Regulations, pursuant to §403.12 (p) the Department is required to notify all Categorical Industries of their obligations under Subtitle C and D of Resource Conservation & Recovery Act of 1976 and the Arkansas Hazardous Waste Management Code. These regulations apply not only to waste that is discharged but also to waste that is hauled or stored. The Hazardous Waste Division may require reporting. For more information contact the Hazardous Waste Chief [(501) 682-0833] at the address below.

In accordance with §403.12(p) Parker "*shall notify the POTW [Trumann Water Department], the EPA Regional Waste Management Division Director, and State hazardous waste authorities in writing of any discharge into the POTW of a substance, which, if otherwise disposed of, would be a hazardous waste under 40 CFR part 261.*"

A form [CIU-SAR_FORM433.wpc] is enclosed. Parker may use this form to submit future reports. The form is available electronically. Please contact the Department at torrence@adeq.state.ar.us to receive a copy electronically.

If Parker or an authorized representative has questions or needs more information, please contact the Department at 682-0626 or by email at torrence@adeq.state.ar.us .

Sincerely,

Rufus Torrence
ADEQ Engineer
