PQL's based on effluent samples which are usually diluted 2X prior to analysis (10X for 2nd Quarter); PQL's for Influent are higher because the samples are usually diluted 10x.

Samples are collected considering flow detention time through the plant. Analytical MQLs are used. MAHL and WQL calculated during development of 2004 TBLL and are based on State Water Quality Standards and implementation procedures. The flow readings (MGD) are reported as daily flow for the date of the analysis and not the average daily flow for the month. CN and Phenol sampled as grabs, 4 grabs over 24 hours combined to be analyzed as one sample. All other pollutants collected as 24 hr composite samples including Hg. Loadings limits for MAHL and WQL calculated using the average yearly sum of L001&L002 flows = 8.078 MGD.

VOC and Pest/PCB all not detected for Influent or Effluent

Influent Grab Samples for VOC, BNA and Pest/PCB collected 06/06/16

Effluent Grab Samples for VOC, BNA and Pest/PCB collected 06/06/16

Based on the information available to the Control Authority, there was no reason to suspect the presence of any toxic or hazardous pollutants listed in Table V, or any other pollutants known or suspected to adversely affect treatment plant operations, receiving water quality, or solids disposal procedures. For this reason no analysis was conducted.

The Rogers Water Utilities, in accordance with U.S. 40 CFR 403.8, NPDES Permit ARO043397 and the City of Rogers Code #54-672, is required to list the Industrial Users that were in significant non-compliance (SNC) with their Pretreatment Program permit requirements and wastewater discharge limits - conditions that protect the City's wastewater treatment plant.

During 2016, Southeast Poultry, located at 2200 Town West Dr., entered SNC status due to increasing the use of potable water to dilute their effluent as a partial substitute for adequate treatment in order to achieve compliance with permit limits. Also, for five months, from June through October, Southeast Poultry violated CBOD5 permit limits. The City's Pretreatment Program carried out compliance enforcement actions requiring corrective measures. The facility has returned to compliance, is accurately monitoring their treated effluent, has had no violations since November 2016 and will be required to upgrade and install pretreatment equipment during 2017.
