**Subject:** AR0043613\_Southern Aluminum ARP001059 Oct 2012 periodic compliance report reply\_20121102

Colleen,

Southern Aluminum's periodic report on continued compliance was received on 10/17/12, reviewed, deemed complete and compliant with the Federal Pretreatment Regulations in 40 CFR 403 and more specifically the Metal Finishing limitations in 40 CFR 433.17.

I've taken the liberty to insert the other metals' analytical results on page 2 of said report from the lab's results.

Please continue to submit analytical results complete with the contract lab's results as well as the Chain of Custody upon any future batch discharges from your wash tank or dip tank combined with your continuous rinse tank's wastewater.

Thank you for your efforts to return to compliance with the Federal Pretreatment Regulations. Your corrective action plan to solve the Zn excursions appears to have worked.

Sincerely,

Allen Gilliam
