Subject: AR0046566_Industrial Metal Finishing #2 (ARP001024) Baseline Monitoring Report (BMR) Submittal Response_20110729

Brian,

Your Baseline Monitoring Report (BMR) was electronically received, reviewed, deemed complete and compliant with the first (one-time) report required of a Categorical industry under the Federal Pretreatment Regulations in 40 CFR 403.12(b). Much appreciation is extended for submitting an understandable process wastewater flow and pretreatment system schematic which in itself, contains a good process narrative description. No further action is deemed necessary at this time regarding the BMR.

The second report required under 40 CFR 403.12(d), "Report on compliance with categorical pretreatment standard deadline. Within 90 days following the date for final compliance with applicable categorical Pretreatment Standards or in the case of a New Source following commencement of the introduction of wastewater into the POTW, [Industrial Metal Finishing Inc.] shall submit to the [ADEQ] a report containing the information described in paragraphs (b) (4)–(6) of this section..."

This second report is equivalent to the semi-annual reports you've previously been submitting for your #1 facility. If sent during the month of October, this will cause both your facilities' semi-annual reports to be conveniently due during the same months (October and April) of each year.

However, you'll be required to submit an analysis of the entire toxic organic list [located in 40 CFR 433.11(e)] if an approved Toxic Organic Management Plan for your facility #2 is not submitted and approved by ADEQ before that time.

The same Metal Finishing Pretreatment Standards (limits) under 40 CFR 433.17 will apply at both your facilities. In other words, Page 2, section (5)C. of your current semi-annual report limits for facility #1 will apply for facility #2's regulated wastewater.

If you have any further questions, please feel free to contact this office.

Sincerely,

Allen Gilliam
ADEQ State Pretreatment Coordinator

Subject: BMR

Allen,

Attached is the BMR for our rack line facility. You also will find diagrams for the operation and pretreatment areas. There are a few blanks on the form due to my lack of knowledge. After looking over the report if you could call me when time presents itself, I would appreciate it greatly. With your help I can hopefully tie up the loose ends. Thanks for everything.
