Dear Mr. Brian Niswonger:

Project Description: Two (2) water sample(s) received on April 11, 2008
IMF 040908

This report is the analytical results and supporting information for the samples submitted to American Interplex Corporation (AIC) on April 11, 2008. The following results are applicable only to the samples identified by the control number referenced above. Accurate assessment of the data requires access to the entire document. Each section of the report has been reviewed and approved by the appropriate laboratory director or a qualified designee.

Data has been validated using standard quality control measures performed on at least 10% of the samples analyzed. Quality Assurance, instrumentation, maintenance and calibration were performed in accordance with guidelines established by the cited methodology.

(7) POLLUTION PREVENTION ACT OF 1990 [42 U.S.C. 13101 et seq.]

§6602 [42 U.S.C. 13101] Findings and Policy para (b) Policy - The Congress hereby declares it to be the national policy of the United States that pollution should be prevented or reduced at the source whenever feasible; pollution that cannot be prevented should be recycled in an environmentally safe manner, whenever feasible; pollution that cannot be prevented or recycled should be treated in an environmentally safe manner whenever feasible; and disposal or other release into the environment should be employed only as a last resort and should be conducted in an environmentally safe manner.

The User may list any new or ongoing Pollution Prevention practices:

Since the beginning of the year IMF has experienced an increase in business. The pollution system in place has reached its capacity as our sample shows. Due to the situation, IMF has purchased additional equipment to increase the capacity and to enhance the monitoring of the system in place. We believe that the volume being sent through our clarifiers has not been settling adequately, Therefore, IMF has purchased a bulk tank to relieve the pressure on the system.
