BMR_FORM 07.doc
(112 KB)

Thanks Brian,

Your above referenced report was received via e-mail on 11/8/10, reviewed, deemed complete and compliant with both the National Pretreatment Regulations in 40 CFR 403 and the metal finishing standards in 40 CFR 433. No further action is necessary at this time.

At this point in time, electronic reporting of your semi-annual reports, etc. is acceptable until this office is advised differently.

Concerning new metal finishing operations beginning in a building separate from your existing facility, it must be treated as a separate facility. Attached is the Baseline Monitoring Report (BMR) required in 40 CFR 403.12(b). This is your first report to be submitted and determined complete. The BMR is a one time report. Please fill in all the information with as much narrative detail as possible. Include a rough schematic of your production and pretreatment tank layout with lines denoting regulated flows from the first operation to the sampling point, direction of flows through pretreatment and a narrative description of your pretreatment procedures.

Please sample and analyze your first regulated wastewater discharge to the City and submit to this office. Your first semi-annual report for this new facility will be due 90 days after your first discharge to the City. We'll establish your two reporting months based upon the receipt of this 90 day report.

You may submit a toxic organic management plan (TOMP) per 40 CFR 433.12(a) and attach it to your BMR.

A new tracking number (ARP00????) will be assigned to your new facility once this information is received.

Thank you for your cooperation in remaining compliant with the National Pretreatment Regulations.

Sincerely,

Allen Gilliam
ADEQ State Pretreatment Coordinator
501.682.0625

ec: Lester Herring/Walnut Ridge Wastewater Manager

Subject: IMF Semi-annual report

Allen,

Here is our report. Once again I apologize for the delay. Will you need a hard copy also, or will this be acceptable? Let me know if I need to do anything else.

Sincerely,

Brian Niswonger
Industrial Metal Finishing, Inc.
