April 2012 Semi Annual Pretreatment Reports Reply_201205245 (Plant #1 AFIN 3800378)

Brian,

Your two (2) semi-annual Pretreatment Reports were received, reviewed, deemed complete and compliant with the Federal Pretreatment Regulations in 40 CFR 403 and more specifically the Metal Finishing limitations in 40 CFR 433.17.

Referring back to the last compliance assurance visit (CAV) at Industrial Metal Finishing's plant #1 on 10/18/11 (IMF #1), a revised, more clear wastewater flow schematic was to be submitted by January 14, 2012. If you remember our conversations during that CAV, there had been some upgrades you indicated could be submitted on two (2) pages to better detail the reconfigured pretreatment system and (I believe) a different polymer injection point. Please submit those updated schematics. The last one in this office's files is dated 11/09 with my last hand-drawn corrections to it dated 11/15/10. That schematic is probably not exactly as you would want it and is pretty cluttered now.

Thank you for your attention to this matter and for your timely submittal remaining in compliance with the Federal Pretreatment Requirements.

Sincerely,

Allen Gilliam
ADEQ State Pretreatment Coordinator
