RE: Owner Name Change of Permits from Georgia-Pacific Crossett LLC to Georgia-Pacific Consumer Operations LLC, North Class 3N Landfill
Permit Number: 0292-S3N AFIN: 02-00013
Document Number: 73045 Cross Reference Identifier: 72892

Dear Ms. Ross:

The Arkansas Department of Environmental Quality Office of Land Resources (ADEQ) Regulated Waste Operations has reviewed your request for name change of Solid Waste Permit 0292-S3N from Georgia-Pacific Crossett LLC to Georgia-Pacific Consumer Operations LLC. ADEQ has determined that the request for name change meets the APC&EC Regulation 8 and Regulation 22 requirements.

Based on the submittals received requesting this change, ADEQ hereby approves the name change for Permit Numbers 0292-S3N to Georgia-Pacific Consumer Operations LLC. In addition, ADEQ has made minor administrative updates to the permit, including removing any expiration date verbiage, and correcting reference in condition 10 and 13 from 'Section 22.619' to 'Section 22.511'. Please find enclosed the updated permit.

If you have any questions, please contact Eric Gillette of my staff at (501) 682-0643 or gillette@adeq.state.ar.us.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles M. Johnson", is written over a light blue rectangular background.

Charles M Johnson
Regulated Waste Operations Senior Manager
Office of Land Resources

cc: ADEQ – C. Johnson, Rich, Cusher, Eddy, Gillette

**PERMIT
FOR THE CONSTRUCTION AND OPERATION OF A
CLASS 3N SOLID WASTE DISPOSAL FACILITY**

ISSUED BY

STATE OF ARKANSAS

**DEPARTMENT OF ENVIRONMENTAL QUALITY
OFFICE OF LAND RESOURCES**

PERMIT NUMBER: 0292-S3N

AFIN IDENTIFICATION: 02-00013

PERMIT CLASS: Class 3N (Non-Commercial) Landfill

EFFECTIVE DATE: October 7, 1997

FACILITY OWNER AND ADDRESS:
Georgia-Pacific Consumer Operations LLC
100 Mill Supply Road
P.O. Box 3333
Crossett, AR 71635

LOCATION: Approximately two (2) miles north of the GP-Crossett Complex. More specifically, take West Pierce Road west off Highway 133 in North Crossett; right on County Road 808; left on County Road 813; left on dirt road after railroad crossing.

LEGAL DESCRIPTION: The west half of Section 6, Township 18 South, Range 8 West, and the eastern portion of Section 1, Township 18 south, Range 9 West.

DESIGN ENGINEER: RMT, Inc.
100 Verdae Boulevard
P.O. Box 16778
Greenville, South Carolina 29606-6778

DESCRIPTION OF THIS PERMIT ACTION: Administrative Permit Updates – Owner Name Change.

PERMIT CONDITIONS: This permit is your authority to construct and/or operate the Solid Waste Disposal Facility set forth in your application dated September 1, 1996. This permit is issued pursuant to the provisions of the Arkansas Solid Waste Management Act (Arkansas Code Annotated 8-6-201 et seq.) as amended, hereinafter called the "Act"; Regulation Number 22, Arkansas Solid Waste Management, as adopted by the Pollution Control and Ecology Commission, hereinafter called "Regulation 22"; and all other applicable rules and regulations of the Department of Pollution Control and Ecology, hereinafter called "Department", and the following terms and conditions:

SEE ATTACHED PAGES FOR ADDITIONAL PERMIT CONDITIONS

STANDARD CONDITIONS:

1. The disposal facility shall be constructed, maintained, and operated in accordance with the final plans, specifications and operation narrative as approved by the Department and in compliance with all applicable provisions of the Act, Regulation 22, and all other applicable rules and regulations.
2. This permit shall automatically terminate unless construction of the disposal facility has been commenced within 180 days of the original effective date of the permit and is completed with all reasonable diligence. The Department shall be notified in writing when the initial construction has been completed and upon facility closure in order that it may be inspected.
3. Disposal operation at the site shall not commence until written authorization is furnished by the Department. Preparation of the site shall be supervised by a Registered Professional Engineer and a written report certifying construction shall be furnished to the Department prior to the placement of wastes.
4. At all times the disposal facility shall be maintained in good condition and operations shall be conducted by licensed, qualified on-site operators holding the appropriate license as required by Regulation Number 27, Certification of Sanitary Landfill Operators. Copies of the approved operating narrative, plans, specifications, operator licenses, and this disposal permit shall be maintained at the site for reference.
5. This permit may be revoked or modified whenever, in the opinion of the Department, the facilities are no longer in compliance with the Act, Regulation 22, and applicable rules and regulations. This permit shall not relieve the permittee, its agents or employees, from compliance with all provisions of the Act and Regulation 22.
6. This permit is issued in reliance upon the statements and representations made in the application, operating narrative, the plans, specifications and related documents and the Department has no responsibility for the adequacy or proper functioning of the disposal facility. Nothing herein contained shall be construed as releasing the permittee from any liability for damage to persons or property by reason of the installation, maintenance, or operation of the disposal facility.
7. This permit is for a 250 acre site with approximately 48.8 acres to be used for disposal in the areas indicated on the final engineering plans. Authorization to dispose of waste under this permit will expire when the disposal area described in the final engineering plans has been filled to design capacity. The final grades and elevations shown on the plans shall not be exceeded in anticipation of settlement and consolidation of the waste mass and changes in the approved fill progression shall not be implemented unless prior approval is obtained through a permit modification.

8. The initial amount of financial assurance required is four million, one-hundred and fifty thousand dollars (\$4,150,000). This amount is subject to annual adjustment and may be increased at the discretion of the Department, based upon the estimated cost for a third party to close the largest area of all permitted facilities ever requiring final cover during the active life and the cost for a third party to perform post closure care. The instruments or demonstrations used to satisfy financial assurance requirements must be in the exact form set forth in Regulation 22 and shall be filed with the Department before disposal or processing operations commence. A portion or all of the financial assurance may be held by the Department beyond the time of cessation of disposal operations at the site to ensure satisfactory closure and post closure care in accordance with Regulation 22.
9. An initial permit fee has been received by the Department. Annual permit fees due hereafter shall be assessed in accordance with Regulation Number 9, Fee System for Environmental Permits. Failure to pay annual fees when due may result in revocation of this permit.
10. Written procedures which meet the requirements of Section 22.511 of Regulation 22 shall be followed for excluding hazardous and unauthorized waste from the disposal area. The hazardous and unauthorized waste screening/detection plan shall be fully implemented, including proper training of facility operators to recognize hazardous waste.
11. An operating record shall be maintained on-site, or at an alternative location approved by the Department, of all documentation, monitoring or test results, construction quality assurance/quality control test results, records, operator license and training certificates, and certifications required by Regulation 22, the permit application documents, and permit conditions contained herein. The operating record shall be available for review by authorized representatives of the Department during normal business hours. The permittee shall provide a copy of any information from the operating record to the Department when requested.
12. Best management practices shall be implemented to control erosion at the site and to prevent off-site deposition of sediment, leachate and waste. In addition to other measures that may be necessary to control erosion, seeding of suitable perennial grasses and soil stabilization shall be conducted in the spring and fall on all exposed surfaces that are not to receive additional waste placement during the next growing season. Erosion and sediment control measures shall also be implemented at all off site soil borrow areas that may be used in conjunction with landfill construction or operation.
13. The permittee shall prepare and submit to the Department an annual engineering report in accordance with the provisions of Section 22.511 of Regulation 22. The report shall cover the one year time period ending March 31 and shall be submitted no later than June 30 of each year.

14. Any change in the ownership of the facilities or control of the operation may be considered a permit modification and shall be fully disclosed to the Department. For purposes of this permit condition, ownership or control shall be determined by a change in the debt or equity of the permittee of five percent (5%) or more. Notwithstanding the above, the permittee is not required to disclose a change in ownership or control of the facility if the change is among the persons and /or entities previously disclosed to the Department in Section E of the Disclosure Statement or similar public disclosure.
15. Any statements in the operational narrative, specifications, and/or engineering plans that conflict with Regulation 22, permit conditions herein, or other applicable laws and regulations shall not be considered authorized by the Department.
16. The Department, its employees, agents, or any authorized person shall have the right to enter the property at any time for any reason as set out in Regulation 22 for the purpose of, including but not limited to, taking of samples, inspection, and any other enforcement or engineering action, without interference or delay from the permittee.
17. The Department's decision to issue this permit is final for purposes of appeal as of the date indicated in the Certificate of Service below.

SPECIAL CONDITIONS:

18. Alternative cover materials such as lime waste, wastewater treatment solids, woodyard grit, and boiler ash may be utilized in lieu of, or in combination with soil materials to control disease vectors, odors, fires, and blowing litter without posing a threat to human health and the environment. The cover materials shall be applied at an adequate frequency and in sufficient quantity to meet the required standards set forth in Regulation Number 22. The Department reserves the right to require periodic soil cover or more frequent application of cover if deemed necessary to control vectors, odors, fire hazards, or blowing litter.
19. Groundwater monitoring shall in all cases comply with the requirements of Subpart E of 40 CFR Part 258, Section 22.524(c) and Chapter 12 of Regulation 22, and be performed in accordance the facility's approved Sampling and Analysis Plan.

Analyses of groundwater samples shall be performed by a water testing laboratory, certified by the Department, and the results shall be submitted directly to the Department from the contract laboratory. The method detection limits (MDL) for each parameter must be reported. Parameter concentrations which are above the MDL but below the Practical Quantitation Limit (PQL) must be reported. Each parameter, which has a Maximum Contaminant Level (MCL), must be analyzed using an approved analytical procedure which has a PQL less than the current established MCL for that parameter. The groundwater parameter list shall, in part, include:

Turbidity	Iron	Benzene
Total Dissolved Solids (TDS)	Barium	Sulfate
Total Organic Carbon	Lead	Temperature
pH	Chloride	Specific Conductance
Chromium (hexavalent)	Manganese	Total Petroleum Hydrocarbon (TPH)
Potentiometric Surface Elevation (MSL)		

In addition to the parameters listed above, the following parameters, selected from Appendix 3 of Regulation 22, are to be analyzed during the establishment of background (ambient) groundwater quality. Any of the constituents (listed below) detected during background sampling shall be added to the previous list, thus completing the list of detection monitoring parameters. Also, once every five years the parameters from both lists (above and below) will be analyzed and those parameters detected from the list below shall be added to the detection monitoring list of parameters.

Arsenic	Fluoride	1,1,1 - Trichloroethane
Cadmium	Lindane	Trichloroethylene
Carbon Tetrachloride	Mercury	Vinyl Chloride
1, 4 - Dichlorobenzene	Nitrate	Zinc
1, 2 - Dichloroethane	Selenium	Copper
1, 1 - Dichloroethylene	Silver	

The groundwater monitoring system and its wells shall be designed and constructed according to Section 22.1103 and Chapter 12 of Regulation 22, and in the locations depicted on the application's drawings.

Monitoring wells in which turbidity values exceed 5 Nephelometric Turbidity Units (NTU) must be redeveloped. If the turbidity remains above 5 NTU, the integrity of the well must be evaluated by a qualified groundwater scientist. If the well is found to be unreliable it must be replaced prior to the next scheduled sampling event.

The permittee, or a designee other than the contract laboratory, must determine whether there is a statistically significant increase (or decrease in the case of pH) for each groundwater monitoring constituent in conformance with the requirements of Section 22.1203 of Regulation 22.

DESCRIPTION OF THIS PERMIT ACTION: This permit is for the construction and operation of a new Class 3 Non-Commercial Solid Waste Landfill.

PERMIT CONDITIONS: This permit is your authority to construct and/or operate the Solid Waste Disposal Facility set forth in your application dated September 1, 1996. This permit is issued pursuant to the provisions of the Arkansas Solid Waste Management Act (Arkansas Code Annotated 8-6-201 et seq.) as amended, hereinafter called the "Act"; Regulation Number 22, Arkansas Solid Waste Management, as adopted by the Pollution Control and Ecology Commission, hereinafter called "Regulation 22"; and all other applicable rules and regulations of the Department of Pollution Control and Ecology, hereinafter called "Department", and the following terms and conditions:

SEE ATTACHED PAGES FOR ADDITIONAL PERMIT CONDITIONS

STANDARD CONDITIONS:

1. The disposal facility shall be constructed, maintained, and operated in accordance with the final plans, specifications and operation narrative as approved by the Department and in compliance with all applicable provisions of the Act, Regulation 22, and all other applicable rules and regulations.
2. This permit shall automatically terminate unless construction of the disposal facility has been commenced within 180 days of the original effective date of the permit and is completed with all reasonable diligence. The Department shall be notified in writing when the initial construction has been completed and upon facility closure in order that it may be inspected.
3. Disposal operations at the site shall not commence until written authorization is furnished by the Department. Preparation of the site shall be supervised by a Registered Professional Engineer and a written report certifying construction shall be furnished to the Department prior to the placement of wastes.
4. At all times the disposal facility shall be maintained in good condition and operations shall be conducted by licensed, qualified on-site operators holding the appropriate license as required by Regulation Number 27, Certification of Sanitary Landfill Operators. Copies of the approved operating narrative, plans, specifications, operator licenses, and this disposal permit shall be maintained at the site or an approved off-site location for reference.
5. This permit may be revoked or modified whenever, in the opinion of the Department, the facilities are no longer in compliance with the Act, Regulation 22, and applicable rules and regulations. This permit shall not relieve the permittee, its agents or employees, from compliance with all provisions of the Act and Regulation 22.
6. This permit is issued in reliance upon the statements and representations made in the application, operating narrative, the plans, specifications and related documents and the Department has no responsibility for the adequacy or proper functioning of the disposal facility. Nothing herein contained shall be construed as releasing the permittee from any liability for damage to persons or property by reason of the installation, maintenance, or operation of the disposal facility.
7. This permit is for a 250 acre site with approximately 48.8 acres to be used for disposal in the areas indicated on the final engineering plans. Authorization to dispose of waste under this permit will expire when the disposal area described in the final engineering plans has been filled to design capacity or upon the expiration date shown above, whichever occurs first. The final grades and elevations shown on the plans shall not be exceeded in anticipation of settlement and consolidation of the waste mass and changes in the approved fill progression shall not be implemented unless prior approval is obtained through a permit modification.
8. The initial amount of financial assurance required is four million, one hundred and fifty thousand dollars (\$4,150,000). This amount is subject to annual adjustment and may be increased at the discretion of the Department, based upon the estimated cost for a third party to close the largest area of all permitted facilities ever requiring final cover during the active life and the cost for a third party to perform post closure care. The instruments or demonstrations used to satisfy financial assurance requirements must be in the exact form set forth in Regulation 22 and shall be filed with the Department before disposal or processing

operations commence. A portion or all of the financial assurance may be held by the Department beyond the time of cessation of disposal operations at the site to ensure satisfactory closure and post closure care in accordance with Regulation 22.

9. An initial permit fee has been received by the Department. Annual permit fees due hereafter shall be assessed in accordance with Regulation Number 9, Fee System for Environmental Permits. Failure to pay annual fees when due may result in revocation of this permit.

10. Written procedures which meet the requirements of Section 22.608 of Regulation 22 shall be followed for excluding hazardous and unauthorized waste from the disposal area. The hazardous and unauthorized waste screening/detection plan shall be fully implemented, including proper training of facility operators to recognize hazardous waste.

11. An operating record shall be maintained on-site, or at an alternative location approved by the Department, of all documentation, monitoring or test results, construction quality assurance/quality control test results, records, operator license and training certificates, and certifications required by Regulation 22, the permit application documents, and permit conditions contained herein. The operating record shall be available for review by authorized representatives of the Department during normal business hours. The permittee shall provide a copy of any information from the operating record to the Department when requested.

12. Best management practices shall be implemented to control erosion at the site and to prevent off-site deposition of sediment, leachate and waste. In addition to other measures that may be necessary to control erosion, seeding of suitable perennial grasses and soil stabilization shall be conducted in the spring and fall on all exposed surfaces that are not to receive additional waste placement during the next growing season. Erosion and sediment control measures shall also be implemented at all off site soil borrow areas that may be used in conjunction with landfill construction or operation.

13. The permittee shall prepare and submit to the Department an annual engineering report in accordance with the provisions of Section 22.619 of Regulation 22. The report shall cover the one year time period ending March 31 and shall be submitted no later than June 30 of each year.

14. Any change in the ownership of the facilities or control of the operation may be considered a permit modification and shall be fully disclosed to the Department. For purposes of this permit condition, ownership or control shall be determined by a change in the debt or equity of the permittee of five percent (5%) or more. Notwithstanding the above, the permittee is not required to disclose a change in ownership or control of the facility if the change is among the persons and /or entities previously disclosed to the Department in Section E of the Disclosure Statement or similar public disclosure.

15. Any statements in the operational narrative, specifications, and/or engineering plans that conflict with Regulation 22, permit conditions herein, or other applicable laws and regulations shall not be considered authorized by the Department.

16. The Department, its employees, agents, or any authorized person shall have the right to enter the property at any time for any reason as set out in Regulation 22 for purposed of, including but not limited to, taking of samples, inspection, and any other enforcement or engineering action, without interference or delay from the permittee.

17. The Department's decision to issue this permit is final for purposes of appeal as of the date indicated in the Certificate of Service below.

SPECIAL CONDITIONS:

18. RE: Georgia-Pacific Crossett Paper Operations Class 3N Landfill Extension of Permit
Permit Number: 0292-S3N AFIN: 02-00013
Document Identifier Number: 46606 Cross Reference Identifier Number: 46447

Dear Mr. Bailey:

The Arkansas Department of Environmental Quality-Solid Waste Management Division (ADEQ-SWMD) has received your request to extend the duration of the above referenced permit for the Georgia-Pacific Crossett Paper Operations Class 3N Landfill. Current regulations state that the landfill permit is effective until the facility places waste beyond the permitted boundaries or exceeds the permitted capacity, fill volume or elevations. Based on the submittal dated March 26, 2007, the Georgia-Pacific Crossett Paper Operations Class 3N Landfill has approximately 99.2 years of remaining site life.

The ADEQ-SWMD hereby provides this administratively modified permit with expiration date removed. Attached is the new permit cover page for the Georgia-Pacific Crossett Paper Operations Class 3N Landfill. Please replace the existing cover page of your permit with the new cover page.

If you have any questions regarding this correspondence, please contact me at (501) 682-0608.

Sincerely,
