North Little Rock, AR 72118-5317

RE: Response to Inspection conducted on August 21, 2025, at Georgia-Pacific Crossett LLC North Landfill; AFIN 02-00013 Permit No. 0292-S3N

Dear Mr. Jackson,

Following the recent inspection conducted on August 21, 2025, at our North Landfill in Crossett, AR, and in response to the Arkansas Division of Environmental Quality Office of Land Resources (DEQ)'s letter indicating conditions that DEQ alleges as violations, we are writing to formally acknowledge the inspection findings in the report dated August 26, 2025. More specifically, Georgia Pacific (GP) acknowledges the erosion observed on the southwest and northwest corners of the North Landfill, during the time of the inspection.

We take the issue seriously and are committed to addressing it to prevent impact to the integrity of the landfill. Please note that erosion repair work at the North Landfill was performed during the summer of 2024 and again in January 2025. Due to several months of above-normal rainfall this year, GP believes that the heavy precipitation may have contributed to the severe erosion with cumulative effects (soil saturation, vegetative stress, overland flow). The contractor mobilized on-site the week of September 15, 2025, to begin corrective actions.

The contractor's scope of work includes:

- Repair and stabilization of the affected slope areas
- Installation of appropriate erosion control measures (e.g. matting, seeding)
- Enhancement of existing stormwater controls to prevent recurrence

Repair work is scheduled to be completed by November 2025, weather permitting. We will continue to monitor the area closely throughout and after the repair work to ensure long-term stability. Thank you for your attention and continued collaboration.

Sincerely,

Sarah Ross, Environmental & Compliance Leader
Georgia-Pacific Crossett LLC
