Dennis Burkes  
Solid Waste Chief  
S.W.D. Arkansas Department of  
Pollution Control & Ecology  
P.O. Box 8913  
Little Rock, AR 72219-8913

Dear Mr. Burkes:

We respectfully request a response to a procedural question. Let me first say that this request for a written response is of great importance to us and it will affect our operations in Northwest Arkansas. Otherwise, we would not consume any of your or your Department's time.

The question is as follows:

**First the general circumstances:** A permit for a transfer station is currently classified as closed by your Department, but the permit holder has continued to pay the annual dues. Further, the permit holder demolished/tore-down the transfer station. Therefore, it no longer physically exists.

**The Questions:** If the permit holder requested to reactivate the permit number, which would require constructing a new facility, will you require the permit holder to go through the same process as others? Which includes requesting a Certificate of Need from the Solid Waste District? Submission of a permit request to ADEQ?

We are going to go before our Tri-County Solid Waste District Board in February and we would appreciate your response prior to this meeting. I look forward to your response and greatly appreciate your time.

Respectfully,

Cheryl Zotti  
Vice President
